

Top 200 Landscaping Website Targets in the USA

Prepared for competitive teardown and template rebuilding on 2026-03-26

This packet combines the 2025 LM150 revenue ranking with 50 additional website benchmark targets pulled from recent landscaping website roundups.

Use Section A for scale leaders, market positioning, service architecture, trust stacks, recruiting patterns, and commercial versus residential segmentation.

Use Section B for design benchmarking, hero sections, call to action placement, gallery structure, testimonial handling, and visual polish.

Reality check: this PDF does not pretend to include a full crawl or screenshots of every page of every site. That was not honestly achievable in this environment. This is the cleanest research packet and crawl queue I could produce without faking work.

Source stack

- Landscape Management LM150 2025 rankings

Fast prompts for Manus

Prompt 1

Audit the 50 benchmark sites in Section B first. Score hero clarity, trust stack, CTA strength, service architecture, before and after proof, testimonial quality, gallery quality, local SEO structure, mobile usability, and visual polish. Return common patterns and the top 15 ideas worth stealing.

Prompt 2

Use Section A to compare our template against the biggest operators in the market. Focus on commercial versus residential positioning, credibility signals, recruiting pages, service area architecture, national versus local navigation patterns, and lead capture methods.

Prompt 3

Build a gap list between our current template and the strongest traits repeated across both sections. Rank each gap as must fix, should fix, or nice to have.
